

## PLAY FIND IT!

What you need: An assortment of familiar objects

- Ball
- Cup
- Book
- Bowl
- Stuffed animal
- Potato masher
- Ladle

What to do:

1. Before starting the game, talk to your child about the basic commands you will be using. For example words like: near/far, left/right, behind/in front.
2. Child closes eyes while you hide the familiar object outside.
3. Have your child open their eyes and you explain the rules: when you say “go” they set off to find the items. You will guide them with commands such as “near”, “far”, “left”, “right”, “inside”, “outside”, “under”, “over”, “behind”, “beside”, “in front of”, and other similar position words they will use in kindergarten math.
